Associate – UiPath

3.MonngoDB Basics for
students

SUMMARY

Aspiring to build a rewarding career in a challenging and growth-oriented environment where I can apply my skills, adapt to new responsibilities, and continuously learn to achieve my full potential.

PROJECTS

AI Powered music instructor

Built an AI system that analyzes user audio to assess pitch and rhythm, provides real-time feedback, and adapts lesson plans based on learner performance, enabling personalized and interactive music education.

IOT based monitoring system for microgrids

Developed a real-time IoT solution to monitor microgrid parameters such as voltage, current, and power, enabling remote supervision, fault detection, and improved energy

KEY ACHEIVEMENTS

1.Vice-President of Build club

A club run by students under the guidance of IITM & CDAC.
